INTEGRATED FLOOD MANAGEMENT – AN ENVIRONMENTAL PERSPECTIVE

ENSEARCH is organizing an “Integrated Flood Management – An Environmental Perspective” training on 10 September 2009 at the ENSEARCH Training Centre from 9.00 am to 5.00 pm.

This course has been designed to provide participants with a systemic, environmental perspective on flood management.

COURSE OUTLINE

Registration

- Managing Environmental Change from the Systems Perspective

- Class Exercise – 5-Step Process applied to flood mitigation projects

Tea Break

- EIA, EMS and Sustainability Principles

- Class Exercise - TNS principles applied to flood mitigation projects

Lunch

- Integrated Flood Management (IFM)

Tea Break

- IFM Case Study – An example from Bangladesh

- Class Discussion – Q & A

COURSE DELIVERY

An interactive approach will be used so that participants can discuss their own operations and the level of presentation can be geared to the knowledge and interests of the participants.

The course will also use visual and verbal presentation as well as group activities in each session.

ABOUT THE FACILITATOR

Ir. Dr. Lee Jin

Ir. Dr. Lee Jin is the executive director of GLS Haidro Sdn Bhd, a consulting company specialising in water resources and environmental management. He is a registered professional engineer, specialising in water resources, environmental and information management. He is currently the Vice-chairman No. 2 of the Malaysian Water Partnership and has been the Honorary Secretary-General and Honorary Treasurer of the Environmental Management & Research Association of Malaysia (ENSEARCH). Ir. Dr. Lee has a doctorate in hydrology from the University of Tokyo, a Masters in water resources engineering from the Asian Institute of Technology in Thailand and a degree in civil engineering from the University of Manchester in the UK. He has been a research fellow at the Japanese Public Works Research Institute and also a senior lecturer at the Nanyang Technological University, Singapore.
