EIA for Infrastructure Development

ENSEARCH is organizing a training session on Environmental Impact Assessment (EIA) for Infrastructure Development on 14th October 2009 at the ENSEARCH Training Centre from 9.00 am to 5.00 pm.

The course of *EIA for Infrastructure Development* has been designed for environmental professionals in both the public and private sector. The main aim is to enable participants to understand how to undertake and review EIAs. The course will cover the main infrastructure sectors such as roads, transmission lines, sewerage and drainage.

The objectives of the course are:

- a. To provide an overview of the environmental issues that are associated with infrastructure development
- b. To outline the process of EIA required for the preparation of an EIA report for an infrastructure project
- c. To provide an overview of environmental management and monitoring of infrastructure projects.

At the end of the course, the participants will be able understand how to undertake EIAs for infrastructure projects, how to perform the review of EIAs effectively and how to scope EIA projects.

COURSE OUTLINE

Morning

- Introduction
- EIA Scoping
- Evaluation of Project Options
- Identification of Principal Project Activities
- Data Requirements and Quality Control

Afternoon

- Identification of significant Environmental Impacts
- Methodologies for evaluating Environmental Impacts
- Designing Effective Mitigation Measures
- Formulating Monitoring Programmes
- How to Review EIAs

ABOUT THE FACILITATOR

Ir. Dr. G. Balamurugan is currently the Managing Director of ERE Consulting Group and is responsible for the management and overall technical direction of the firm. He has a B. Eng. (Civil) degree from Universiti Teknologi Malaysia, M. Phil. from Universiti Malaya and PhD from the University of Manchester, UK.

Dr Bala has served as a consultant to several Malaysian Governments agencies such as the Economic Planning Unit, Department of Irrigation & Drainage, Department of Environment, Highway Planning Unit, Department of Town & Country Planning, to many large corporations and non-governmental organizations. His main areas of interest and expertise are environmental and natural resources management and sustainable development. He has worked on over 250 projects in Malaysia, Indonesia and Brunei.

Dr Bala has published a large number of papers in both local and international journals and has addressed many conferences on subject matter pertaining to environmental and natural resources management.
